PROFESSIONAL SUMMARY

Computer Science graduate with a foundation in Python, Java, SQL, HTML, CSS, and JavaScript, and hands-on experience developing web applications. Familiar with frontend development, backend programming, database integration, and building user-focused application features. Demonstrates problem-solving and leadership experience through academic projects and innovation initiatives. Seeking an entry-level Full Stack Web Developer opportunity to contribute technical skills and continue learning.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Core Concepts: OOP, Data Structures, Exception Handling
Frontend and Backend: HTML5, CSS3, JavaScript, Python, Django
Database: MySQL, DBMS
Tools: Git, GitHub, Visual Studio Code

INTERNSHIP / TRAINING EXPERIENCE

Python Programming Training and Certification – YBI Foundation-2024
Completed structured Python programming training covering core programming concepts and practical problem-solving.

- Python fundamentals, variables, data types, operators, control structures and Functions
- Problem-solving practice to strengthen logical thinking and Python programming skills.

PROJECTS

E-HEALTHCARE MANAGEMENT SYSTEM
Technologies: HTML, CSS, Java, Servlets, JSP, MySQL

- Developed a web-based healthcare management system with patient registration, doctor management, and appointment scheduling functionalities.
- Implemented user authentication and registration using Java Servlets and JSP, with MySQL database integration for storing and managing application data.
- Designed interactive frontend pages and implemented appointment management workflows to streamline patient interactions and healthcare service access.

ONLINE UNIVERSITY ADMISSION SYSTEM
Technologies: HTML, CSS, JavaScript, Python, MySQL

- Developed a web-based university admission management system to simplify student registration and application processing.
- Integrated frontend components with Python backend functionality and MySQL database to store, retrieve, and manage student application records.
- Implemented admission workflow features to organize application data and improve accessibility and management of student information.

AI SMART HOME AUTOMATION SYSTEM
Technologies: Python, Machine Learning, Random Forest, IoT

- Developed an AI-powered smart home automation system to monitor environmental conditions, detect potential safety hazards.
- Implemented a Random Forest machine learning model to identify risks including smoke, fire, and glass breakage.
- Integrated automated alert functionality to notify users of detected abnormalities, enhancing home monitoring and safety.

EDUCATION

B.Tech – Computer Science Engineering | Malla Reddy College of Engineering for Women, Hyderabad | CGPA: 7.67 | 2026
Diploma – Electrical & Electronics Engineering | Jyothishmathi Institute of Technology and Science, Karimnagar | CGPA:7.61

CERTIFICATIONS

- NPTEL Elite Certification – Industrial Internet of Things (IIoT): 72%.
- NPTEL Elite Certification – Soft Skills: 62%.

ACHIEVEMENTS & LEADERSHIP

- Served as Team Lead for YUKTI Innovations for three years, participating in innovation-focused academic activities.
- Contributed to collaborative problem-solving, idea development, and prototype-oriented work as part of the team.

SOFTSKILLS

Team Leadership, Teamwork and Collaboration, Problem-Solving, Communication, Adaptability, Time Management.
